Technical data

Our Company produces Power Lignite mainly used in electric and heat generation, in Thermo Plants.

Lignite characteristics (specification schedule attached):

- Calorific power = 7.55÷13.00 MJ/Kg

Preparation lignite:

- Granulation = 0÷150 mm;
- Imbibition humidity initio = 30.0÷37.54 %;
- Total humidity = 35÷45 %;
- Hygroscopic humidity = 4÷6 %.
- Content combustible sulfur = 0.55÷1,21 %;
- Content total carbon without humidity = 55÷65 %;
- Content total sulfur = 0,88÷1,54 %;
- Ash content, initio = 11÷23 %.

Available 20.000.000,00 to/year

Unit price/to, with heat value, at delivery basis: loaded in truck/wagon 19.4 Euro/to.

Terms of payment: bank transfer
